## **Normandale Neighborhood Roadway Reconstruction**

Dear Resident:

The following is a quick update of the project in your neighborhood:

### **Neighborhood Reconstruction Schedule – Stage 1 (Sherwood and Ryan Avenues, and Parnell Avenue north of 64th Street)**

Selected portions of existing curb and aprons have been removed and will be replaced on Monday.

The contractor will continue to supplement the natural rainfall by watering hydro-seeded areas. The seed is growing well, aided by the excellent weather.

The block of Parnell north of 64th Street will be hydro-seeded as soon as the contractor can get this work scheduled.

### **Neighborhood Reconstruction Schedule – Stage 2 (Parnell Avenue south of 64th Street and West Shore Drive)**

The contractor has finish installing new concrete curbs and driveway aprons. If you have a new driveway apron, the contractor has already or will shortly build a gravel ramp up to the new concrete. You may access your driveway once that work is complete.

Except for those waiting to gain access to their new driveways, parking will not be allowed in the street for the next week. The contractor will grade the gravel in the street on Monday through Wednesday.

The first layer of asphalt paving will be placed either next Thursday or Friday, weather permitting. The roadway will be open for traffic during the paving process with isolated closures in areas where crews are working. You may drive on the asphalt shortly after it is compacted by the roller. Crews will be on site to direct you.

Irrigation systems have been plugged where they have been cut by the construction crews. These systems can now be repaired by the contractor. Each homeowner with an affected system received a flyer with contact information for this work.

### **Communications**

For detailed information about the project, visit [www.edinamn.gov/construction\\_normandale\\_reconstruction](http://www.edinamn.gov/construction_normandale_reconstruction). The City of Edina and Northwest Asphalt thank you for your patience and cooperation throughout the project.

Regards,

Joe Clement, SEH
